

## Social Networks

### Main Sites:

Twitter (to 'tweet' short sentences)

Facebook (multi-purpose, develop a profile about you and create events)

Linked-In (Professional / Career-development)

YouTube (upload films onto the internet)

### **Twitter**

This is one global network and is in nearly every country around the world.

Tweets stay in the language they were written – so if you had a friend in France you would read their tweets in French.

### How Tweeting an ECI would work

Example Tweet: Sign the #ECI CP to get the European Commission to debate capital punishment- [www.eci.eu](http://www.eci.eu)

Because of the language barrier, you would need (influential) people/ newspapers starting off tweeting about it in each country, and it would be best if they all used a common #hashtag. This is the thing which allows people to search on a topic to see tweets on that topic by people who you are not following.
